

Barba Azul Reserve Bird List

The following is a list of 240 birds recorded at the Barba Azul Nature Reserve by the Glasgow University student expedition in August 2009, with additions by Mauricio Herrera and Bennett Hennessey. As of April 2010, this list is probably only 30% complete. Bird names in bold are Threatened [Critically Endangered (CR), Endangered (EN), Vulnerable (VR) of extinction, or Near Threatened (NT)], endemic, rare, or particularly interesting birds in the reserve. Additional birds added by D. Lebbin based on a trip with Bennett Hennessey to the reserve in April 2012. Species added included Pinnated Bittern, Ocelated Crane, Chimango, Large-billed Antwren, Green-backed Becard, Ashy-headed Greenlet, and Long-tailed Reed-finch.
